DEMOCRATIC MEMBER CONTROL

Our co-op is well suited to meet the needs of our members because we are locally governed. Each member gets a voice and a vote in how the co-op is run, and each voice and vote are equal.

Our board of directors, which helps set long-term priorities for the co-op, also lives locally on co-op lines. These board members have been elected by neighbors just like you. We know our members have a valuable perspective, and that's why we are

continually seeking your input and encourage you to weigh in on important co-op issues and participate in co-op elections.

Locally-owned and operated, that's one thing that sets your cooperative apart from other types of utilities. JCE Co-op is guided by a board of directors who are members of the cooperative, elected by members to serve three-year terms.

Jo Daviess County **Director Elections** Three director districts are up for election in 2025. These districts are 1, 2 and 4. There are no contested elections this year. When only one candidate files in a district, no ballots are mailed, and the election is by a motion of Shanno acclamation at the annual meeting. Lanark Candidate biographies and more information on the Carroll election process can be found in the May Hi-Lines County and on jcecoop.com. Your director district can be found on your monthly billing statement. Whiteside County Henry County Electric | Natural Gas | Fiber Internet (Includes Pre-Construction through Fiber Install stages) County borders District borders

David Senn Board Chairman, JCE Co-op Board of Directors

No matter the challenges we face, our focus is the best interest of the local communities we serve.

RURAL ROOTS.

For 86 years, you - the members - have been the grassroots of what is now JCE Co-op.

Grassroots? You are the voice of the co-op, providing the direction that the organization might take, and more importantly, protecting your rights to have a voice in the future of co-ops. The need for you to inform our political leaders that your independence as an organization matters to each and every co-op across the United States.

Your co-op was established and built by local people who have served our area for decades. We know our communities - their needs, resources and challenges. This organization prides itself on reliability and moving forward to meet the needs of rural America. The move to high speed fiber is an excellent example.

On more than one occasion, JCE Co-op has been asked to send a representative to testify before Congress on the needs of rural America and their cooperatives who provide needed services to their members.

Advocating on behalf of members is a critical part of our commitment to you. We are working with co-ops across the country to stress the need for high-speed internet and advocate for smart energy policies that bolster reliable, affordable energy for our communities. No matter the challenges we face, our focus is the best interest of the local communities we serve.

Your voice, THE GRASSROOTS, adds strength to communicate our needs to both state and federally elected senators and congresspeople. Yours is the voice that will preserve our rural areas and ensure all rural Americans have access to the same technological attributes of urban areas.

CO-OP VALUE

When I first viewed the cover of the Annual Report, a feeling of pride resonated through me. To me the image expresses multiple meanings. It represents JCE Co-op's deep roots in the rural communities that we serve dating back 86 years, our strong community ties, and our passionate desire to build on and improve our communities for the next generation.

The image also expresses strength, growth and nurturing. The deep roots capture our longevity, the new growth that spurs from those roots, and our next generation of members.

JCE Co-op is rooted in our communities because we were established by local leaders who understood the value of bringing essential services to our rural landscape. Sparked by the need for electricity in the rural areas of our counties, area farmers banded together to form your co-op.

Today we continue to be committed to delivering safe, efficient and reliable service to you every day.

As a member of JCE Co-op, you are represented by leaders in our communities who you democratically elect to JCE's board.

Roots run even deeper considering the many local JCE employees whose family origins go back five generations or more. We are your neighbors, friends and family.

Because we are local and deeply rooted in the communities that we serve, we are incentivized to improve the quality of life in our area.

The foundation of JCE Co-op is built on seven sound principles, concern for community being one that clearly stands out to me.

Please don't hesitate to reach out to us with questions, feedback, or ways we can improve our service to you. We are committed to being your trusted advisor and utility service provider.

Mike Casper JCE Co-op President & CEO

We are incentivized to improve the quality of life in our area and are committed to delivering safe, efficient and reliable service to you every day.

2024 ANNUAL MEETING MINUTES

The Annual Meeting of the Members of JCE Co-op was held at Saint Malachy School in Geneseo, Illinois, on Thursday, June 20, 2024, pursuant to duly given notice.

Chairman of the Board David Senn, called the meeting to order at 6:00 P.M. He welcomed attendees to the JCE Co-op Annual Meeting and thanked the Board of Directors and the entire JCE Co-op staff. Chairman Senn also announced that a question-and-answer session would be held at the end of the meeting.

Chairman Senn noted that this was the 85th Annual Meeting of the members and confirmed that a quorum was present.

Approval of Agenda

The Chairman called for approval of the Annual Meeting Agenda. A motion was made, seconded, and carried unanimously to approve the agenda as printed.

Invocation and Pledge of Allegiance

Russ Holesinger provided the invocation, followed by the Pledge of Allegiance led by the Chairman.

Welcome and Introductions

Director Bob Kuhns welcomed the attendees and performed a song for the members.

The Chairman introduced the Board of Directors in attendance, noting the district each represented, and identified the officers of the Cooperative. He also introduced Mike Casper, President & CEO; Terry Kurt, General Counsel; and recognized former JCE Co-op board members present at the meeting.

President and CEO's Remarks

Mike Casper, President and CEO, welcomed several special guests and recognized former and current employees, as well as the Saint Malachy School and its staff. He provided a safety moment, highlighting the cooperative's commitment to maintaining a culture of safety.

Approval of 2023 Annual Meeting Minutes

The Chairman stated that the minutes of the 2023 Annual Meeting were included with the official meeting notice. A motion was made, seconded, and carried unanimously to approve the minutes as printed in the annual meeting booklet.

Election of Directors

General Counsel Terry Kurt, explained that in accordance with the bylaws, elections were held for Directors in Districts 5 and 8, and there were two Directors elected by acclamation in Districts 7 and 10.

- Pat Smith of Galena received the most votes in District 5 and was declared duly elected for a three-year term.
- Ted James of Fulton received the most votes in District 8 and was declared duly elected for a three-year term.
- By acclamation, Dave Senn of Mt. Carroll was elected to a three-year term for District 7, and Bob Kuhns of Geneseo was elected to a threeyear term for District 10.

Amendments to the Bylaws

General Counsel Kurt outlined amendments made this year to the Bylaws of the Cooperative, specifically:

- Article II, Section 7(d)
- Article II, Section 12
- Article IX, Section 1(2)
- Article IX, Section 3

Kurt asked for a motion and a second to approve the bylaw amendment. The motion carried and the change will be made to the bylaw.

Chairman's Report

Chairman Senn delivered his report, reflecting on 85 years of service to the members. He highlighted the growth of the Cooperative's three core business units: Electric, Natural Gas, and Fiber.

Annual Report from the President and CEO

In his Annual Report, President and CEO Mike Casper emphasized JCE Co-op's dedication to the community and its commitment to safety, efficiency, and responsible service. He provided examples of the Cooperative's growth and its mission to deliver reliable utility solutions.

Guest Speaker

President and CEO Casper introduced guest speaker Jeremy Johnson, Vice President of Engineering and Operations at Prairie Power, Inc., of which JCE Co-op is a member.

Acceptance of Reports

The Chairman called for a motion to accept the officers' written and oral reports, as well as the financial statements. A motion was made, seconded, and carried unanimously to accept the reports as presented.

The President and CEO then answered questions from the members, alternating between questions from the members present, and written questions submitted by members prior to the meeting.

The Chairman asked if there was any other business, and hearing none, adjourned the meeting at 7:00 P.M. with the awarding of attendance prizes to follow.

Respectfully submitted, Dan Tindell Secretary

RURAL ROOTS. CO-OP VALUE.

ELECTRIC

We have been providing reliable energy since 1939. And on those occasions when the lights do go out, so do we! When an outage occurs, we move fast to safely restore your power. Our trained crews are on call 24/7 to restore your service.

We rarely have power outages, and when we do, the power is back on within a couple hours. My friends with other utilities have suffered long outages at times, and have felt the need to purchase expensive whole house generators. I've never felt the need for one, since JCE always get things up and running quickly.

Co-op member

FIBER INTERNET

We offer high-speed fiber internet, phone services and a range of value-added solutions. Our fiber delivers superior reliability, faster speeds and the advantage of local member support. Our service packages are tailored to meet the needs of residential, small business and commercial members.

Since receiving fiber internet seven years ago, we have implemented smart technology solutions for our farm. Tasks like checking truck weights and managing irrigation can now be done remotely, saving time and effort. With fast and reliable internet speeds, JCE Co-op has helped our farm grow and modernize to operate smarter.

Jerry Brearton
Neumiller Farms Food Safety Chief
Thomson

NATURAL GAS

We provide reliable natural gas services to Carroll and Whiteside County areas. Dedicated to safety and member satisfaction, we support residential, commercial and industrial clients, promoting energy efficiency and sustainable practices in all operations.

JCE Co-op was highly rated in all four areas that are required of System Operational Achievement Recognition (SOAR). JCE Co-op consistently demonstrates a commitment to providing natural gas safely and efficiently to all those in their community and as such, serves as a model for all other natural gas utilities in the country.

Dave Schryver APGA President & CEO

ENERGY ADVISOR

No matter your energy source, John Scott (Inspector Watts) will help you investigate potential savings in your residence, business or farm. Walkthrough assessment and building audits help members optimize energy usage, reduce costs and improve efficiency.

Exceptional experience.
Even though we were told that the house was insulated, it really only had minimal insulation and in many places, none. I learned so much and John was very willing to explain it to me....
I have told my family and all my neighbors.
This is one of the best experiences I've had over the past months.

Chris, Galena

GEOTHERMAL

This system takes advantage of the stable year-round temperature found a few feet beneath the ground. A single piece of HVAC equipment has the ability to keep your home comfortable all year long in addition to providing some or all of your hot water needs.

According to the U.S. Environmental Protection Agency (EPA), geothermal systems are the most energy efficient, environmentally clean, and cost-effective space conditioning systems available. A geothermal heat pump provides yearround heating and cooling.

U.S. Department of Energy

SAFETY

We prioritize the well-being of all members by ensuring a safe and secure environment through comprehensive training, hazard identification and continuous monitoring. With a focus on proactive risk management, JCE Co-op fosters a culture of safety, ensuring both employees and members are protected.

JCE always prioritizes safety and makes it a point to stay in compliance with the new and everchanging rules, staying on top of changes in the industry. They are always easy to work with, and their safety manager consistently prioritizes employee training to ensure the team is well-prepared and knowledgeable.

Levi Vogt AIEC Safety Instructor

YOUTH ENGAGEMENT

In support of our students in our service territories, Illinois electric co-ops give our leaders of tomorrow an opportunity to learn about their state legislation, the co-op model or apply for scholarships to further their education.

In 2016, JCE Co-op sponsored me to attend Youth Day, an opportunity that left a lasting impression. Now, nearly a decade later, I'm thrilled to see my journey come full circle as I proudly accepted a position with the very co-op that inspired me. It's incredible to be part of this team and to contribute to the co-op values that helped spark my passion.

Jordan, Elizabeth Broadband Scheduling Representative JCE Co-op

COMMUNITY INVOLVEMENT

During Co-op Month 2024, a group of volunteers from JCE Co-op and Dairyland Power teamed up with the Gramercy Park Foundation to clear part of the park's north bluff in East Dubuque. Projects like this demonstrate it's important to be a good neighbor and community partner.

The visit from the co-op volunteers to Gramercy Park in October was an incredible win for Gramercy Park! The project that day gave our North Bluff improvement plans a huge jump start, by reclaiming about an acre of prime bluff top landscape from years of neglect and overgrowth. At least 3 native American earthworks were brought back into view.

Jeffrey Trannel Gramercy Park Foundation

FINANCIAL ASSISTANCE

As a co-op, we are deeply rooted in our communities. Co-ops have a proud history of giving back, and members help us give back, too. Our Neighbor to Neighbor Care Program for energy assistance provides help to those in need, right here in our communities.

When our members face economic hardships, energy security is the last thing we want our membership to be worried about. Our Neighbor to Neighbor program works in tandem with LIHEAP, however any income qualifying residential member needing energy assistance can receive funds whether or not they received LIHEAP.

Jennifer Meyer VP of Cooperative Services JCE Co-op

CAPITAL CREDITS

We operate at cost and give credit back to our members rather than outside investors or shareholders. At the end of a year, if any operating revenue is left over, we allocate it as capital credits. When financial conditions permit, the board of directors votes to pay capital credits back to you.

Only co-ops make every customer an ownermember of the business. You share in your co-op's success. Receiving cash back over time is one of the benefits of being a co-op member. In 2024, JCE Co-op retired approximately \$1.6 million in capital credits.

> Mike Casper President and CEO JCE Co-op

SENIOR PLANET

In partnership with AARP, JCE is helping older adults learn new technology skills and make new friends. These in-person classes are held in our service areas and are open to all seniors 60+. This aligns well with JCE's vision to enhance the quality of life for our members.

We love learning new tips and techniques on our smartphone, computer, and streaming services. The class sizes are comfortable and just the right fit, and many of our technical questions were answered. Thanks to these workshops, we're now able to apply our new tech skills in our everyday lives. We're excited to attend more sessions and workshops.

Mary, Hanover

CO-OP CONNECTIONS

Save hundreds at local and national businesses. This free program allows members to get their discounts shopping online through connections.coop, the Co-op connections mobile app or by using the card. Get your card by requesting it from the co-op.

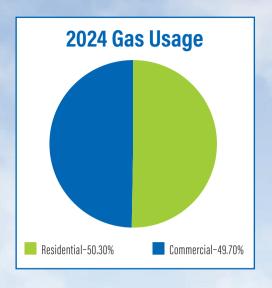

Members have saved more than 47% off the retail price for prescriptions when using Co-op Connections. The card is accepted at more than 60,000 pharmacies, including 20,000+ independents and all the major chains. And the full Healthy Savings suite also includes discounts for dental, vision, chiropractic care and diabetic supplies.

VALUE OF CO-OP PARTNERS

Dairyland Power Co-op (Dairyland) and Prairie Power, Inc. (PPI) are the generation and transmission (G&T) cooperatives that provide the power required by JCE Co-op electric members 24/7/365.

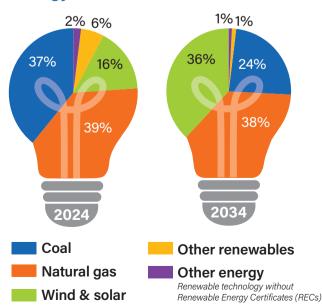

Safety is a top priority. If employees do not work safely, the delivery of reliable and cost-competitive electricity cannot happen. Employees are authorized to stop work and speak up if something is unclear or they have questions about the best way to proceed.

Diversifying Sources

Dairyland's decarbonization goal includes diversifying the sources used to generate electricity. Last year was a banner year as Dairyland was awarded more than \$600 million in grants for projects that will help reduce Dairyland's carbon footprint and add resiliency to the grid through more than 1,000 MW of renewable energy projects and battery storage, as well as upgrades and rebuilds to existing transmission infrastructure.

Dairyland Power Cooperative generates electricity by using both traditional and renewable energy resources to provide safe, reliable and affordable electricity. Dairyland owns and operates several power plants utilizing a progressive 'all of the above' strategy: hydroelectric, natural gas, coal, landfill gas and solar generation. Below is a quick breakdown of our generation mix:

Energy Resources

A \$28 million cooperative agreement award with the U.S. Department of Energy's Office of Clean Energy Demonstrations will strengthen grid resilience by bringing long-duration energy storage opportunities to rural communities served by Dairyland members and includes a project at Frentress Lake in JCE Co-op's service territory. Utility scale battery storage supports reliability as a back-up technology resource for intermittent renewable energy.

In alignment with our G&Ts and statewide and national associations, together we work with elected officials, regardless of party affiliation, to advocate for policies benefiting electric cooperatives. With a new federal administration, together we are monitoring developments and advocating for co-op priorities that support growth and development in the rural communities we serve.

As part of its overall sustainable power supply plan, Dairyland continues to explore small modular nuclear reactors. Nuclear will drive the clean energy transition by providing reliable baseload, carbonfree power to support economic growth and the integration of wind and solar.

No Transition Without Transmission

JCE Co-op, Dairyland and PPI are part of the Midcontinent Independent System Operator (MISO), which is the air traffic controller for reliable and cost-effective electricity in a 15-state region plus the province of Manitoba, Canada.

One critical aspect of reliably powering the lives of more than 40 million people in the MISO footprint is building new power generation facilities; the other is efficiently delivering electricity to where it is needed. In September 2024, the 102-mile, 345 kilovolt (kV) Cardinal-Hickory Creek transmission line was energized between Dubugue, Iowa, and Middleton, Wis. Dairyland is a 9 percent owner of the line with ATC and ITC Midwest.

At the end of 2024, MISO announced Tranche 2.1 of its long-range transmission plan (LRTP) totaling \$21.8 billion for 24 projects and 323 facilities in planned transmission line upgrades and construction investments. The result will be a transmission backbone of more than 3,600 miles of 765 kV and 345 kV transmission lines. With these large

projects, costs are spread among the entire MISO footprint. MISO estimates that, in addition to maintaining reliability and enabling load growth, the project will result in \$1.80 to \$3.50 of benefit per \$1 spent.

Although Dairyland and PPI are on a path to decarbonization, they are taking a measured approach that ensures reliability too.

Community

On Oct. 2, 2024 about 200 volunteers from Dairyland and 10 electric cooperatives converged on six community service project sites to make a difference in our local communities. We are proud to share that JCE Co-op and Dairyland employees participated at Gramercy Park in East Dubuque to clear brush on the North Bluff of the park. This is a very visible demonstration of our Cooperative Principles of Cooperation Among Cooperatives and Concern for Community.

About MISO

The Midcontinent Independent System Operator (MISO) is an independent, notfor-profit, member-based organization responsible for keeping reliable and cost-effective power flowing across 77,000 miles of transmission lines. MISO focuses on three critical tasks:

Managing the flow of high-voltage electricity across 15 U.S. states and the Canadian province of Manitoba

Facilitating one of the world's largest energy markets with more than \$40 billion in annual transactions

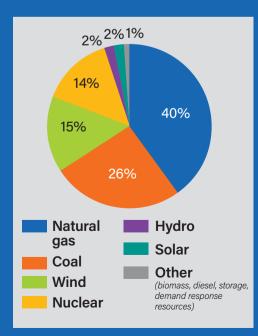

Planning the Grid of the Future

The MISO footprint has reduced its carbon intensity by

since 2014.

In 2024, generation facilities in MISO produced

638 million MWh

2025 BYLAW AMENDMENTS

Proposed Bylaw Amendment

Changes to bylaws in red. New additions in blue.

The current version of the bylaws do not adequately distinguish between Class A and Class B members. The new amendment clearly defines Class B Members as those who receive services other than retail services. This amendment will allow the co-op to better track Class B Members and allow for a more accurate calculation of capital credits based on the use of co-op services by each member class.

Article II Section 6. Member Classes. Based upon a Member's use, receipt, or purchase of one (1) or more Cooperative Services, the Cooperative may group Members in the following classes ("Member Classes"):

(a) Class A Member: Any Members using, receiving, or purchasing - who receive electric, gas, and/or broadband retail services from the Cooperative. Retail services are defined as supply, distribution and transmission of electric, gas, and broadband. The member can be elected as a director and earn capital credits based on their use of these services.

(b) All Cooperative Services associated with, or regarding, the provision of electric power, natural gas and/or telecommunications/broadband services to a residential. or commercial, dwelling or structure, owned, controlled, or directly occupied by the Member.

Class B Member: Any Members using, receiving who receive services other than retail services provided by the Cooperative. The member earns capital credits based on their use of these specific services. However, Class B members cannot vote at meetings or run for director positions in the Cooperative. or purchasing any Cooperative Service regarding the provision of electric power, natural gas and/or telecommunications/broadbandservices to any dwelling or structure owned, controlled, or directly occupied by the Member.
