

The Ultimate Fiber Connected Home

A 100% fiber-optic connection keeps your smart devices running smoothly with ultra-fast, reliable performance—built for today's demands and tomorrow's technology.

Equipment

- 1 **Fiber NID** is the transition point between the drop fiber and installation fiber. Provides a location to test the service.
- 2 **Fiber Router and Modem** (included) provides top of the line dual band (2.4 Ghz & 5.8 Ghz) Wi-Fi. For the best performance, place your router in a central location to support multiple wired and wireless connections.
- 3 **Wi-Fi Extender** helps extend Wi-Fi coverage in the home. Designed to increase signal in hard to reach or distant locations.
- 4 **Local access line (Local Loop)** allows you to extend your service to remote outbuildings such as barns, workshops and garages.
- 5 **Wireless VoIP Phone & VoIP ATA** provides a modern replacement for traditional landline phone(s). Saves you money while allowing you to keep your existing phone number or get a new number.
